RIDER SCHEDULE NM

Effective Date: April 30, 2012
Filed Date: April 23, 2012
Supersedes: NM filed 5/4/09
Schedule Consists of: Two Pages

OPTIONAL RESIDENTIAL/COMMERCIAL NET METERING RIDER

I. AVAILABILITY

Net Metering is available to any residential or commercial customer who

- A. has a net generating capacity of no more than 25 kW and 300 kW per location respectively, and
- B. takes service under the following standard rate schedules: Residential and Farm Service (RS), Master-Metered Residential Apartment Service (MMRA), Small General Service (GS), Master-Metered General Service (MMGS), Large General Service (LGS), Large Industrial Service (LIS), or Large Industrial Power Service (LIPS), and
- C. has installed a net metering facility and signed a Standard Interconnection Agreement for Net Metering Facilities with the Company.

Such facilities must be located on the customer's premise and intended primarily to offset some or all of the customer's energy usage at that location.

Customers may not take service under this tariff and simultaneously take service under the provisions of any other alternative source generation or co-generation tariff.

The provisions of the customer's standard rate schedule are modified as specified herein.

II. NET MONTHLY BILL

If the kilowatt hours supplied by Company exceeds the kilowatt hours generated by the net metering facility, the Net Metering Customer shall be billed for the net kilowatt hours supplied by Company in accordance with the rates and charges under the Customer's standard rate schedule.

If the kilowatt hours generated by the Customer's net metering facility exceed the kilowatt hours supplied by Company, the Net Metering Customer shall be credited during the next billing period for the excess kilowatt hours generated. For the final month in which the Net Metering Customer takes service from Company, the Company shall issue a check to the Net Metering Customer for the balance of any credit due in excess of the amounts owed by the Customer to the Company. The payment for any remaining credits shall be at the Company's standard rates for purchases at avoided cost in accordance with Section 204 (a), (c), and (e) of the LPSC's Avoided Cost Order dated February 27, 1998.

III. GENERAL PROVISIONS

Under net metering only the kilowatt hour units of the Customer's bill are affected.

Metering equipment shall be installed to both accurately measure the electricity supplied by Company to the Net Metering Customer and also to accurately measure the electricity generated by the Customer that is fed back to Company during the applicable billing period. The cost of the meter is the responsibility of the Company, but the Company will assess a one-time charge to cover the initial installation, testing, and interconnection costs. The Company will also assess a charge for any additional work by the Company other than that required for the normal net meter installation. Such charge will be calculated based on the specific case. The charge for the initial single-meter installation will be as follows:

Initial Single Net Meter Installation	\$100.00
